1 Introduction

About this publication

An introduction

This document relates to the Pearson Edexcel Level 1/Level 2 GCSE (9–1) in Physical Education and GCSE (9–1) in Physical Education (Short Course).

It is for centres and teachers to use in order to mark the practical activities that students will perform as part of the assessment for the Practical Performance component of the qualification.

The document give you:

- general marking guidance on how to use the practical performance assessment grids
- guidance on assessing students with physical disabilities
- guidance on recording practical performances
- the activity-specific assessment criteria for practical performances.

The document must be read and used in conjunction with the relevant specification.

General marking guidance

- All students must receive the same treatment. Teachers/assessors must mark the last student in exactly the same way as they mark the first.
- Mark schemes should be applied positively. Students must be rewarded for what they have shown they are able to do rather than penalised for omissions.
- Teachers/assessors should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- All the marks on the mark scheme are designed to be awarded. Teachers/assessors should always award full marks if deserved. Teachers/assessors should also be prepared to award zero marks if the student's response is not worthy of credit according to the mark scheme.
- When teachers/assessors are in doubt regarding the application of the mark scheme to a student's response, the team leader must be consulted.

Using these practical performance assessment grids

For GCSE Component 3: each of the three practical performances is marked out of 35. The three marks are added together to give a total for this component out of 105 marks.

For GCSE (Short Course) Component 2: each of the two practical performances is marked out of 35. The two marks are added together to give a total for this component out of 70 marks.

The assessment grids are identical and applied in the same way for both qualifications.

Each activity's assessment grid contains two columns, headed as follows:

The performance of skills and techniques in isolation/unopposed situations	Application of skills, techniques and decision making under pressure during conditioned practices and a conditioned/formal/competitive situation
<p>Candidates will be assessed on the skills listed below when performed in isolation or unopposed practice.</p> <p>Skills should be shown in increasingly progressive, pressured and demanding drills, which could include some direct competition but with no intended outcome at the end of the drill/practice (i.e. not shown in a full game).</p>	<p>Candidates will be assessed on the quality of appropriate skills, techniques and decision-making processes to meet the challenges of a conditioned/formal/competitive situation, including using the appropriate skills/techniques:</p>

For the each respective column, students will be expected to:

1. perform their activity's skills/techniques (as described in the content/skills section of the assessment grid) in isolation/unopposed situations. This is assessed out of 10 marks.
2. apply their activity's skills/techniques in controlled practices and a conditioned/formal/competitive situation with the motivation to win the game/competition/complete a performance . This is assessed out of 25 marks.

Where it becomes apparent to the assessor that the students are not being given the opportunity to demonstrate their full range of skills in a formal/competitive game situation, assessors may intervene to create an opportunity (for example permitting defenders to switch sides) or use a conditioned practice (for example a one-on-one, or drill with additional instructions) to allow students to demonstrate their appropriate skills. This caveat applies predominately to team game activities (such as football, rugby union, rugby league, hockey, lacrosse, basketball, camogie,

hurling, handball, netball, volleyball, Gaelic football, cricket) but may also apply to other activities where necessary.

The difference in marks between the two columns indicates the different emphasis, with the player/performers activity in a conditioned practice and competitive situation having more weight than their skills and techniques in isolation/unopposed situations.

How to award marks for the levels-based mark scheme

Finding the right level

The first stage is to decide which level the performance should be placed in. To do this, use a 'best-fit' approach, deciding which level most closely describes the quality of the performance.

Performances can display characteristics from more than one level, and where this happens markers must use their professional judgement to decide which level is most appropriate.

Placing a mark within a level

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance.

Teachers/assessors should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Teachers/assessors should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the performance meets the requirements of the level.

- If it meets the requirements fully, markers should be prepared to award full marks within the level. The top mark in the level is used for performances that are as good as can realistically be expected within that level.
- If it only barely meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for performances that are the weakest that can be expected within that level.
- The middle marks of the level are used for performances that have a reasonable match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

For skills in isolation:

- If it meets the requirements fully and consistently, markers should be prepared to award full marks within the level. The top mark in the level is used for performances that are as good as can realistically be expected within that level.
- If it meets the requirements of the level but barely and/or inconsistently, markers should award marks at the bottom of the level. The bottom mark in the level is used for performances that are the weakest that can be expected within that level.

Assessing students with physical disabilities

There is a range of specialist activities for students with physical disabilities to choose to perform if they wish. When assessing students with physical disabilities, centres need to apply necessary amendments and adaptations to any practical activities (including the specialist activities) to ensure that the individual student is neither advantaged nor disadvantaged in the assessment because of their specific disability, while retaining the integrity of the activity itself.

Students with physical disabilities must fulfil the requirements of the practical assessment and cover the required elements of the specification.

Where centres assess students who have amended techniques due to the nature of their impairment (for example catching, passing and kicking for amputees), it must be shown that the technique underpins the skill and it is the skill that is assessed.

As with all students, the overall assessment must be in a 'like 4 like' situation.

Students with physical disabilities often develop extremely effective techniques, which are very skilful, although their performance may not be as effective in a non-disabled competitive situation.

Guidance relating to the use of alternative evidence for practical performance

If the teacher/assessor cannot be present for/at a performance, then alternative evidence must be made available to them so that assessment decisions can be made.

In addition, the controls relating to feedback must be maintained. Unless it is required for health and safety reasons, feedback is not permitted during the assessed performances.

The most suitable form of alternative evidence will be video.

Recording practical performances

The following guidance applies to Component 3: Practical Performance when recorded evidence is required for assessment purposes.

The purpose of the recording is to evidence all marks awarded. Therefore, all recordings must be made under controlled conditions.

The centre must ensure the activities on moderation day are recorded. Candidates must introduce themselves and are identified on the video before the activity starts.

All recordings must be a complete and unedited recording of each performance.

The camera must be positioned to ensure that **the best possible and unobstructed recording is made of the performance**, as it would be seen by the marker/examiner.

Each student should be introduced at the start of each performance. They should provide the following information:

- student name and number
- performance role.

Before the assessment

Video evidence should be produced in a standard/common format, such as a DVD, or a 'free to access' IT application, such as Windows Media Player or Quicktime. This is important as it will ensure that the teacher/assessor is able to use the video for assessment purposes, and that Pearson will be able to use the video where necessary/appropriate for moderation.

Video evidence should clearly show all the assessment requirements of the selected physical activity, which will probably require a combination of:

- wide-angled shots, to give an overall perspective
- closer range shots, to show aspects such as stance, posture and position
- close-up shots to show specific requirements and techniques, for example grips in racket activities.

In order that all the assessment requirements are shown, it may be useful for the video to be accompanied by a commentary, or storyboard, and also that, where possible, the assessment requirements be shown 'in order'.

Therefore, students being assessed must be easily identifiable. If the video shows the student in a team game, they should be clearly identifiable by a number, or a particular item of clothing. Centres must consider the responsibilities relating to the acquisition, and use, of alternative forms of evidence, for example the need for parental, or even student, consent relating to the use of video and photographs.

The following checks should be made to resources before the recording:

- ensure that the camera being used has the appropriate facilities for adjusting recorded sound levels – particularly if the camera is to be positioned some distance from the students
- check that the picture recorded by the camera is clear enough to identify individual students
- ensure that memory cards have sufficient space for each recording
- check the camera battery is charged and a power lead is plugged in/available if needed.

Student identification

- Plan students' kits that will support identification on the recording, e.g. different-coloured bibs.
- Test how these kits look on camera from an identification point of view, particularly for students in large groups.
- When watching work prior to marking, check students' use of space can be captured by the camera.
- Ensure that students state their name, candidate number and role at the start of each activity.

Students are assessed as individuals and, as such, it is vital that they can be identified individually throughout all assessed performances.

Test the camera

- Record a small section of work (perhaps a small game/conditioned practice) using the actual camera needed for the performance with students.
- Check that an audio signal has been recorded and that students can be seen without obstruction and heard clearly.
- Adjust camera position and/or recording levels as needed.

At the beginning of the assessment

- Position the camera as practised.
- Film each performance, beginning with the student introductions. Each student must introduce themselves, with a clear pace and at audible volume, stating name, student number and role.

During the performance

- Check that recording is taking place for each group and that students are fully visible on screen.
- Check available power/battery/memory, as needed, in between the examination performances.

After the assessment

- Check the recordings, ensuring that each group has been recorded with audio.
- Ensure **all recordings are backed up** and transferred to appropriate format for assessment
- The recording should be saved with the centre number, qualification title and the relevant component number.
- Ensure that the recordings are kept secure until sent to Pearson and any backups kept safely until after Enquiries about Results.

2 Team activities

Association Football

Players must participate in conditioned practices and a full-sided competitive game to meet the criteria for the second column. Where it becomes apparent to the teacher that the students are not being given the opportunity to demonstrate their full range of skills in the game, teachers may intervene to create an opportunity (for example permitting defenders to switch sides) or use a conditioned practice (for example a one-on-one, or drill with additional instructions) to allow students to demonstrate their appropriate skills.

Players must participate in conditioned practices and a full-sided competitive game to meet the criteria for the second column. Where it becomes apparent to the assessor that the students are not being given the opportunity to demonstrate their full range of skills in the game, assessors may intervene to create an opportunity (for example permitting defenders to switch sides) or use a conditioned practice (for example a one-on-one, or drill with additional instructions) to allow students to demonstrate their appropriate skills.

Rugby League

Players must participate in conditioned practices and a full-sided competitive game to meet the criteria for the second column. Where it becomes apparent to the assessor that the students are not being given the opportunity to demonstrate their full range of skills in the game, assessors may intervene to create an opportunity (for example permitting defenders to switch sides) or use a conditioned practice (for example a one-on-one, or drill with additional instructions) to allow students to demonstrate their appropriate skills.

Volleyball

Players must participate in conditioned practices and a full-sided competitive game to meet the criteria for the second column. Where it becomes apparent to the assessor that the students are not being given the opportunity to demonstrate their full range of skills in the game, assessors may intervene to create an opportunity (for example permitting defenders to switch sides) or use a conditioned practice (for example a one-on-one, or drill with additional instructions) to allow students to demonstrate their appropriate skills.

The performance of skills and techniques in isolation/unopposed situations	Application of skills, techniques and decision making under pressure during a conditioned practice and conditioned/formal/competitive situation
<p>Candidates will be assessed on any four of the skills listed below when performed in isolation or unopposed practice. Skills should progress so that they are being performed at a suitable speed on an appropriate gradient, according to the level of ability.</p> <ul style="list-style-type: none"> • handling of skis (carrying, putting on and taking off) • standing after a fall • side step up/herring bone • traversing • side slipping • straight running (schussing) • stopping (plough, skid/parallel) • control of rate of descent (ploughing, carving, short radius, amplitude) • control direction (plough steering, plough parallel, linked parallel, carved and skidded arcs) as well as other specific traits (see levels). 	<p>Candidates will be assessed on the quality of appropriate skills, techniques and decision-making processes to meet the challenges during a conditioned/formal/competitive situation. This includes using the skills/techniques (listed in the lefthand column) in either a slalom (1:15 gates depending on level), or downhill or ski cross or slopestyle. To qualify as a 'competitive situation', there must be external factors that candidates must deal with: this might be other competitors, but it might simply be the environment.</p> <ul style="list-style-type: none"> • management of the course • managing speed • managing direction • adapting to changing conditions • adapting to changing terrain • adapting to competitors • route selection appropriate to level • use of appropriate physical attributes to benefit the performance (coordination, dynamic balance) • focus and self-control to the demands of the conditioned/formal/competitive situation. • ability to adapt to external factors • adhering to rules, health and safety guidelines, and considering appropriate risk management strategies
